Request to Change Password to avoid spam & phishing email attacks
(um.uob.edu.pk)

It has been observed that many student and faculty email accounts are using weak passwords, due to which their email addresses are compromised and used by spammers for sending SPAM & phishing emails, which is affecting the overall credibility of Office365 tenant and causes users to block from login or sending out emails.

It is requested to all users to change their passwords and use relatively strong and long passwords that contains combination of upper and lowercase letters & characters. An example of a good passphrase: "HeCPak@786!#".

You can also use below link to change your password.
