Abstract:

This research paper reviewed the poetic attributes and similarities of great classical Pashto poet Khushal Khan Khatak (1613- 1689) and his contemporary Arabic classic poet Antra Bin Shadad. The researchers strived to explain the literary works of both the classical poets in terms of similarities in terms of form, text, diction and message in the light of their poetry. Both the poets keep the similarities in their mood and personality in their literary works, although both of them have no similarity in area, language, nationality and era. However, the similarity in their literary work is worth reading.

Key words: khushal khan khattak, antaza bin shaddad, poetry, comparative study.
